IN THE preparation of this work, Dr. Joseph A. Pratt offered invaluable assistance as mentor, graduate adviser, and friend. In December 1985 during my first conversation with him he introduced me to the topic of the transition from manufactured to natural gas by northeastern utilities as a possible case study that I would do for him as a research assistant. The resulting brief study gradually evolved into a dissertation on the regulated pipelines which supplied the natural gas to those northeastern utilities. Dr. Pratt also provided me with several research opportunities in corporate history projects at Texas Eastern Corporation (now a subsidiary of Panhandle Eastern Corporation) and Tenneco, Incorporated. Participation in these projects allowed me to greatly enhance the quality of this work; I also express my appreciation to those two firms, which opened their records. In addition, I thank the Business History Group (Dr. Louis Galambos, Dr. Joseph Pratt, and Robert Lewis) for generous support in writing the dissertation on which this book is based. Tab Lewis, T. Lane Moore, and William Creech of the National Archives directed me to useful records. I also received welcome encouragement from many faculty members and graduate students at the University of Houston, where I completed my graduate studies and revised this work.

Those who read the manuscript at various stages of development offered useful suggestions. I owe much appreciation to my editor, Mansel B. Blackford, for both reading the manuscript and offering insightful suggestions on expanding its theoretical framework; an anonymous reader also provided significant suggestions for improving the manuscript. In this light, I offer thanks to Alex Holzman of the Ohio State University Press for making contact with me at a business history conference regarding my dissertation and suggesting I keep in touch with

him about it—which I did. Additional readers included Alan D. Anderson, James A. Castaneda, Kenneth Lipartito, Martin Melosi, Joe Pratt, and Alan Stone.

Others assisted in a variety of ways. Fran Dressman, Catherine Felsmann, Dr. John O. King, Bob Kirtner, Trey Mecom, David Munday, Dr. Robert Palmer, Brad Raley, Clarance Smith, and Christine Womack deserve mention for a diversity of important reasons, not the least of which was friendship during the course of this work.

Finally, I express gratitude to my wife, Terri, for her support and encouragement and to my children, Courtney and Ramsey, just for being there.
