CONTRIBUTORS

RITA BECK BLACK, M.S., D.S.W., is associate professor at the Columbia University School of Social Work and assistant project director of the Maternal and Child Health Training Grant. She has trained in both social work and genetic counseling, and her research and publications have centered on the psychosocial dimensions of genetic and reproductive technologies. She is co-author of Social Work and Genetics: A Guide for Practice.

CAROLE H. BROWNER, Ph.D., M.P.H., is professor in the Department of Psychiatry and Bio-behavior Sciences and the Department of Anthropology at UCLA. She is a medical anthropologist with more than fifteen years' experience in Colombia, Mexico, and the Unites States on issues concerning women's reproductive health and health care decision-making. She has published widely and is now working on a monograph on the politics of reproduction for Cambridge University Press.

R. ALTA CHARO, J.D., is assistant professor of law and medical ethics at the Schools of Law and Medicine at the University of Wisconsin. She specializes in the politics of biology and human reproduction. Recent writings have appeared in the Texas Journal of Women and the Law and the St. Louis University Law Review.
ELLEN WRIGHT CLAYTON, M.D., J.D., is assistant professor of law and of pediatrics at Vanderbilt University and is a Charles E. Culpeper Foundation Scholar in Medical Humanities. She has a longstanding interest in the implications of reproductive genetic technologies. Her research has also included studies of informed consent, the doctor-patient relationship, and factors that lead patients to sue their physicians. She has published widely in the legal, medical, and ethics literature.

RUTH SCHWARTZ COWAN, Ph.D., is professor of history at the State University of New York, Stony Brook. She is a historian of science, currently writing a history of prenatal diagnosis. She also writes and teaches in the fields of women's history and the history of technology.

RUTH FADEN, Ph.D., M.P.H., is director of the Program in Law, Ethics, and Health at Johns Hopkins University, and she is senior research scholar at the Kennedy Institute of Ethics at Georgetown University. Her primary area of scholarship is in ethics and health policy, with a particular focus on issues affecting women and children.

ELENA A. GATES, M.D., is associate clinical professor in the Department of Obstetrics, Gynecology, and Reproductive Sciences at the University of California, San Francisco. In addition to her clinical work, she is active in the area of medical ethics, particularly as it applies to reproductive medicine. Her recent work has focused on the ethical considerations concerning prenatal genetic testing and fetal treatment.

DEBORAH KAPLAN, J.D., is an attorney with a disability who focuses on disability public policy. She is vice president of the World Institute on Disability, and director of its Division on Technology Policy.

PATRICIA A. KING, J.D., is professor of law at the Georgetown University Law Center, and her expertise is in the study of law, medicine, ethics, and public policy. She is coauthor of Cases and Materials on Law, Science, and Medicine and has published widely.
in the area of reproductive ethics. She has served on numerous national and bioethics commissions and groups including the Ethical, Legal, and Social Implications (ELSI) working group of the Human Genome Project.

**Abby Lippman**, Ph.D., is professor of epidemiology and biostatistics at McGill University, Montreal, and she chairs the Human Genetics Committee of the Council for Responsible Genetics, Cambridge, MA. In her research and activism she focuses on the application of genetics from a feminist perspective, emphasizing the increasing geneticization of health and illness and the biopolitics of biomedicine. She has published widely in both the professional and lay literature.

**Mary B. Mahowald**, Ph.D., is professor at the Pritzker School of Medicine and MacLean Center for Clinical Medical Ethics, University of Chicago. She taught philosophy for fifteen years before moving to a hospital and medical school complex in 1982. Her most recent book, *Women and Children in Health Care: An Unequal Majority*, elaborates her philosophical orientation and emphasis.

**Laurie Nsiah-Jefferson**, M.P.H., is a research scientist for the New Jersey State Department of Health. She has expertise in the areas of reproductive health issues as they relate to low-income women and women of color and has worked with many agencies and programs on issues relating to perinatal addictions, AIDS, maternal and child health, and reproductive genetic testing. She has published in such journals as *Fetal Diagnosis and Therapy* and the *Women’s Rights Law Reporter*, as well as in the books *Women, Health, and Technology: Perspectives & Prescriptions* and *Reproductive Laws for the 1990s*.

**Nancy Anne Press**, Ph.D., is a medical anthropologist in the psychiatry department at UCLA. Her major areas of interest are women and health, bioethics, and genetics. She has presented lectures and published a number of papers on these issues. She is a member of the advisory board for the University
of Washington's Ethical Paradigms in Genetics Project, and she is on the Clinical Ethics Committee at UCLA.

**Rayna Rapp**, Ph.D., is professor of anthropology and chair of gender studies and feminist theory at the New School for Social Research. She is currently completing a book on the social impact and cultural meaning of prenatal diagnosis based on anthropological field work in New York City. She has been active in the movement for women's studies and for reproductive rights for over twenty years, and has published widely.

**Karen H. Rothenberg**, J.D., M.P.A., is the Marjorie Cook professor of law and director of the law and health care program at the University of Maryland School of Law. She specializes in health law particularly in the area of women's health and has published articles in the *New England Journal of Medicine; Law, Medicine, and Health Care*; and numerous law reviews. She is currently president of the American Society of Law, Medicine, and Ethics.

**Barbara Katz Rothman**, Ph.D., is professor of sociology at the Baruch College and the Graduate Center of the City University of New York. Her major work on women and reproductive testing, *The Tentative Pregnancy: How Amniocentesis Changes the Experience of Motherhood*, has also been published in Great Britain and in Germany. Her other books include *Recreating Motherhood* and *In Labor: Women and Power in the Birthplace*, and she edited *The Encyclopedia of Childbearing*.

**Elizabeth J. Thomson**, M.S., R.N., is coordinator of genetics services research in the Ethical, Legal, and Social Implications Branch of the National Center for Human Genome Research. She is board certified in genetic counseling by the American Board of Medical Genetics and has also been actively involved in a number of nursing and genetics organizations, including cofounding the Genetics Nurse Network, which became the International Society of Nurses in Genetics. In addition, she has published papers and given presentations on genetics, birth defects, nurses' roles in providing genetic services, and genetic counseling.
Women and Health Series

Rima D. Apple and Janet Golden, Editors

The series examines the social and cultural construction of health practices and policies, focusing on women as subjects and objects of medical theory, health services, and policy formulation.

*The Selling of Contraception: The Dalkon Shield Case, Sexuality, and Women's Autonomy*
Nicole J. Grant

*And Sin No More: Social Policy and Unwed Mothers in Cleveland, 1855–1990*
Marian J. Morton
